1. Main Menu

Reporting	-> access to the database
Books	-> World Robotics report in PDF format
Config	-> data administration for own login or further logins
Logout	Logout for Homepage

2. Reporting

Got to the *Reporting* section to get access to the World Robotics – Industrial Robots database. Here, you can do custom queries and export the results to Excel. You can also do a full dump of the data (that your license contains).

Alternative: To get commented data on industrial robots in pre-defined tables, you can download the PDF of World Robotics - Industrial Robots in the *Books* section.

2.1 Create A New Report

- *Choose the Report Type:* Press “Robots by industry” or “Robots by Application” to select the appropriate category. Note: It is not possible to get an “industry-application” matrix.
- *Choose the Visualisation:* You can receive your output as a table (“grid overview”), as a column chart or as a CSV file.
- *Compose the Data:* To create you desired putput, press *Compose data*.

Reports and Charts

Create A New Report

1. Choose the Report Type

Robots by Industry

Robots by Applications

1. Choose report type

2. Choose the Visualisation

Grid Overview

Column Chart

CSV download

2. Choose visualisation

3. Compose the Data

3. Press the button

Stored Reports

If you selected “grid overview”, you are asked to make the following choices:

1. Choose the *main issue of the report*
 - This is the main filter of the report.
 - Click on + to see a list of available categories. You can choose between:
 - Country
 - Industry or application (depending on the report type you chose)
 - Values (delivered market or operational stock)
 - Time Period
 - Note that you can choose just one category and one value, for instance a single year. If you select a category here, you cannot select it as a row or column value anymore.
2. Choose the column category by pressing + in the first row of the (still empty) table. The attribute levels appear. To remove individual attribute levels, press -.
3. You can choose a second column category by pressing + below any attribute level.
4. Repeat sets 2 and 3 analogously to select one or two row categories.

Click here to define the main issue of the report - +

Save Excel Reset Back

1. Choose main filter

Action Button

delivered - Delivered - +

Save Excel Reset Back

	WR WORLD	AFR AFRICA	ZA South Africa	ROA Rest of Africa	EG Egypt	MA Morocco	TN Tunisia	OAF Other Africa	AM AMERICA	NAM North America	US United States (North America)	CA Canada Until 2010 included in US (North America)	MX Mexico Until 2010 included in US (North America)
	+	+	+	+	+	+	+	+	+	+	+	+	+
	-	-	-	-	-	-	-	-	-	-	-	-	-

3. Select second column category if desired

4. Repeat steps 2 and 3 for rows

Action Buttons

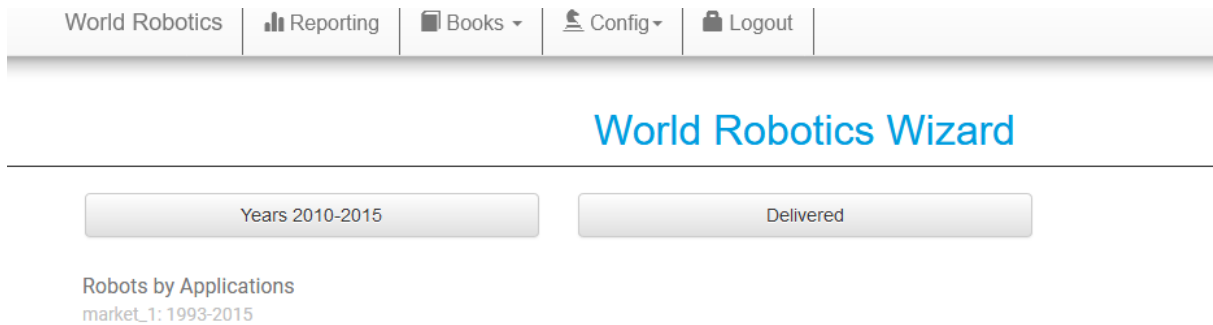

Save: save your report in the Wizard to get quick access

Excel: download your report to Excel

Reset: reset and create a new report

Back: get back to the main menu

2.2 Get data in a chart

- Choose time period by clicking *Years 2010-2015* and press *set*
- By pressing on the *delivered* button, you can toggle between delivered (Market), which is the annual installation data and the operational stock data

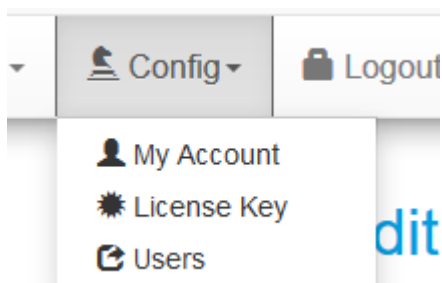

3. Books

- Select *Chapters* to get the PDF documents of the studies **World Robotics - Industrial Robots and Service Robots** going back to 2005. From 2009 on, separate studies for Industrial Robots and Service Robots are available. Before 2009, service robotics were treated in a chapter of World Robotics.
- Select *Case studies*, to get the selection of case studies published in World Robotics.

4. Config

In the *Config* menu you can administer your account.

- Choose *my account* to change the password or your personal information. This is necessary for the *password forgotten* function.
